CAREER OBJECTIVE

As an experienced frontend developer, I have proven track record in developing responsive, accessible and user-centred design web applications using modern React and various CMS platforms. My digital marketing and strong communication skills deliver high-quality solutions through web technologies and best practices. I seek a software developer role where I can offer my technical expertise.

SKILLS SUMMARY

Technical: React.js, Nextjs, Typescript, Redux, Sass, HTML, CSS, Bootstrap, TailwindCSS, npm, Git, SQL, Python, WordPress, Laravel

Development & Project Tools: Unit testing (Jest), Github, Jenkins, Jira, Rally, Figma, Docker

Others: Excellent communication and interpersonal skills, leadership capabilities, collaborative teamwork

EDUCATION

Master of Information Technology

Queensland University of Technology

Brisbane, Australia

July 2025 – July 2027 (*expected*)

B.Sc Information Technology

Polytechnic University of the Philippines

Manila, Philippines

2012 – 2016

WORK EXPERIENCE

Web Developer | Freelance | Remote | April 2022 – May 2025

Tools: WordPress, Wix, Webflow, Laravel, | Shopify | MySQL, FTP

- Maintained various marketing and services pages, collaborating closely to align with business goals and optimizing websites for increased user engagement and enhanced user experience.
- Developed and maintained e-commerce (WooCommerce) websites for Singaporean and Australian companies using Wix, Webflow, and WordPress, collaborating on website design, development, and payment integrations.
- Partnered with an Arabic health and nutrition company to build and maintain bilingual websites, ensuring SEO optimization, responsiveness, and security.
- Partnered with US counterpart to maintain web and mobile applications for podcasts, handling feature updates, deployments, and bug fixes which generated increased user acquisition.
- Led a project by planning and developing a new website, which involved creating tickets, coordinating with clients, and establishing all necessary acceptance criteria. Demonstrated project management tools for improved project visibility and delivery timelines.

Frontend Engineer at Samsung R&D Philippines

October 2022 – November 2024

- Developed and upgraded network monitoring application with React and Redux-Saga in visualizing dynamic metrics using Highcharts which led to a more intuitive dashboard.
- Delivered dashboards by integrating frontend components with RESTful APIs, proactively collaborating with backend developers and monitoring newly builds and deployments using Jenkins.
- Resolved UI defects and improved design consistency across dashboards using Sass, Storybook, and Jest.
- Implemented and consumed RESTful APIs to fetch, display, and update data in real-time, using Git and Perforce, and continuous delivery pipelines via Jenkins.
- Improved test coverage metrics by implementing unit tests, refactoring code structure, and maintaining continuous testing protocols that ensure regression prevention and improved code quality.
- Actively performed as scrum master, presented newly deployed features to internal clients, and addressed issues during sprint demo and sprint planning that follow consistent precision-oriented approach.

Frontend Developer at Cloud Development Resources Inc., Philippines

May 2022 – August 2022

- Implemented rapid client-side development to build website POCs using low-code development (OutSystems), delivering cost-effective validation and improved client satisfaction.
- Ensured mobile and web-responsiveness in design.

AEM Frontend Developer at MRM/McCann Worldgroup (Hedy PH)

September 2020 – May 2022

- Developed and improved websites using AEM, JSP, and JavaScript, ensuring responsive and seamless design across web, mobile, and email platforms, which led to production-ready marketing outcomes and improved user experience.
- Streamlined frontend development by implementing reusable components and optimizing code with Sass, Bootstrap, and CSS that enhances accessibility across devices.
- Worked closely with cross-functional teams across all project phases, leveraging Git and Azure DevOps for version control and task tracking that ensures faster deployment issue resolution and quick development fixes.

Digital Marketing Coordinator at Reed Elsevier Philippines

February 2019 – August 2020

- Developed websites in AEM and email marketing campaigns using EPiServer and Eloqua aligning with business objectives and delivering mock-ups that boosted user engagement and expanded market reach.
- Conducted manual quality checks to ensure responsive design across different platforms using CSS and HTML for more seamless cross-platform functionality.
- Deployed and managed marketing content and email campaigns using Eloqua.

Content Operations Specialist at Teradata Philippines

September 2016 – January 2019

- Worked with digital asset management and other internal systems to manage intellectual property assets.
- Administered intranet sites by maintaining site contents and features and providing solutions to inquiries from global resources.
- Created test cases for new tools/systems to be used in digital asset management for quality assurance.

VOLUNTEER EXPERIENCE

Youth Ministry Leader | MMIM Local Church (2009-2014)

- Led youth ministry programs and mentored young individuals in spiritual and personal development.
- Participated, hosted and helped organize community events, improving teamwork and leadership skills.

Event Organizer & Host | Polytechnic University of the Philippines (2014-2015)

- Organized and hosted academic and non-academic events, including pageants and inter-departmental programs.
- Managed full event lifecycles from planning, budgeting, and inviting student volunteers for execution.
- Coordinated with faculty, judges, and student groups, enhancing public speaking and project management skills.

Referees available upon request.
